MATON FLAMINGO GUITAR

555 - An advanced design featuring smooth moulded finish with attractive double cutaway and fall away style for easy handling, allowing freedom to all twenty fret positions. Slim lined with full length adjustment from nut to end of fingerboard by guaranteed MATON Truss Rod Control - an improved MATON feature.

Twin single-poled "Magnamette" MATON Pick-ups for the modern sound are easily selected and changed by a quick-action Pick-up Selector Switch. New Roller head all-metal bridge gives extra sustaining power. New rugged free action Tremolo Arm offers extra long life by incorporating ball-bearing movements. Smooth "played-in" low-playing action frets. Only featured in MATON Guitars. Colours: Flamingo Red. Deep Purple. White.

Case: Hardboard-Flannel lined.

Every fret hand fitted and polished.

MATON SOLID GUITARS are built of the finest timbers and workmanship is of the highest standard. All materials used in the finish of MATON Guitars are supplied to rigid standards by reputable manufacturers. However, lack of care can be detrimental to fittings and polished surfaces. Keep your instrument clean and in a case where possible.

Every MATON Spanish-style solid model is fitted with an adjustable neck truss for long life and perfect action. Seek advice on adjustment from your dealer. Strings have a limited life and frequent changes of a complete set is advisable to avoid your guitar giving dull response, uneven balance and playing out of tune.

Remember your guitar is as good as the care and attention it receives.
